Q1

Confidential Consent Form for Survey Participants

This survey follows up on the project **"My Opinions and Experiences in Quebec"** in which you participated last year, during your participation in the first survey in May or June of 2023.

At that time, you had agreed to be contacted again **for another survey**. Today, we invite you to participate in our survey once again. This survey covers subjects like : your experiences in various areas of society in Québec and your use of different public services.

To participate in the survey:

1. Read the following information. Before agreeing to participate in this research project, please take the time to read and acknowledge the following information. This document will explain the goal of this research project and its procedures, advantages, risks and drawbacks. We invite you to communicate with the research team if you have any questions.
2. Click on the "Next" button at the bottom of the page to begin the survey.

Project title : “My Opinions and Experiences in Quebec”

Who directs this project?

This project is directed by Valérie-Anne Mahéo, researcher at the Faculty of Social Sciences at Université Laval.

What is this project?

This project surveys adults living in Quebec to collect their personal experiences in various sectors of activity (culture, leisure, work, community life, etc.) and their use of various public services (in health, culture, education, etc.). The results of this survey will allow us to see how people living in Quebec take part in various areas of society and whether the use of certain programs and public services encourages certain individual’s participation in specific areas of life. The conclusions of this study will inform public decision-makers to help them improve the services offered to the population.

If I participate, what will I have to do?

We ask you to participate in an online survey that will take about 30 minutes to complete.

Do I have to answer every question and complete the survey to the end?
No. You can choose not to answer one or more questions. You can also determine at any time that you no longer want to participate in the survey and choose to abandon the project. In this case, you can even ask us not to use your answers for research and to destroy them. However, once the data release process is initiated, we will not be able to destroy the analyzes and results relating to your responses, but no personally identifiable information will ever be released.

Q2 **Are there risks or advantages to participating in this research?**
There are no major risks in answering the survey questions. However, it could be the case that some of the questions could cause certain people to remember difficult or moving moments of their life, which may cause emotional or psychological stress or discomfort. If you need support, we have provided a list of publicly available resources at the end of the survey. Your participation is important and will allow us to better understand the use of public services and participation in various areas of life in Quebec in order to improve these services and the lives of residents of Quebec. You can indicate if you want to receive the results of this project at the end of the survey.

To thank you for your participation, we offer you **$30** that will be sent to you within the next 6 weeks via Interac e-Transfer (we will ask you in the survey to communicate your information for you to receive the e-Transfer). You will also be eligible for a random draw in August 2024 for the chance to win one of three $100 gift cards (for groceries or a prepaid Visa card). The draw will take place before a witness and the winners will be contacted by email to receive their prize.

What will you do with my answers?
During the research project, all data will be kept on a secure server at Université Laval. The data in digital format will be kept in encrypted files, access to which will be password protected. Only authorized researchers will be able to access this file and only the head researcher will have access to personal data (which will be kept separate from the survey responses) which may be used to contact you for another survey if you allow us. However, this information will be destroyed in November 2026, at the latest. The collected survey data will be saved digitally and anonymously, will be used for research purposes only, and will never be leased or sold.

Will my data be protected?
Confidentiality is guaranteed during data collection. Research results will always be presented globally, and as such, participants' individual results will never be communicated, and no personal information will appear in publications or the broadcasting of results.

Who can I speak to if I have questions during the study?
If you have questions about the research, the implications of your participation, or would like to withdraw from the project, please communicate with Valérie-Anne Mahéo (Head Researcher)

or Juliette Samson (Project Coordinator), at the following phone number: 367-382-6652, or at the following email address: opinions.experiences@pol.ulaval.ca.

For any concerns about your rights or the researchers' responsibilities concerning your participation in this project, you can contact the Université Laval's Ombudsman Office: Pavillon Alphonse-Desjardins, office number 3320, 2325 rue de l'Université, Université Laval, Quebec (Quebec) G1V 0A6. Information - Secretariat: (418) 656-3081 or toll-free number: 1-866-323-2271. Email: info@ombudsman.ulaval.ca . This project has been approved by the Université Laval Research Ethics Committee: No 2022-059 A-5 / 13-05-2024.

Q3 **CONSENT Participant declaration** I understand I can take my time to think before agreeing to participate or not. I can ask questions to the research team and demand satisfying answers. I understand that in participating in this research project, I am neither waiving any of my rights nor am I releasing the researcher of any of her responsibilities. I took notice of the present information and consent form. After reasonable consideration, I freely consent to participate in the research project "My opinions and experiences in Quebec".

Acknowledgements

Your participation is essential in allowing us to conduct this study. For that reason, we want to thank you for the time and attention you accept to dedicate to this project.
